Fargo, ND, United States

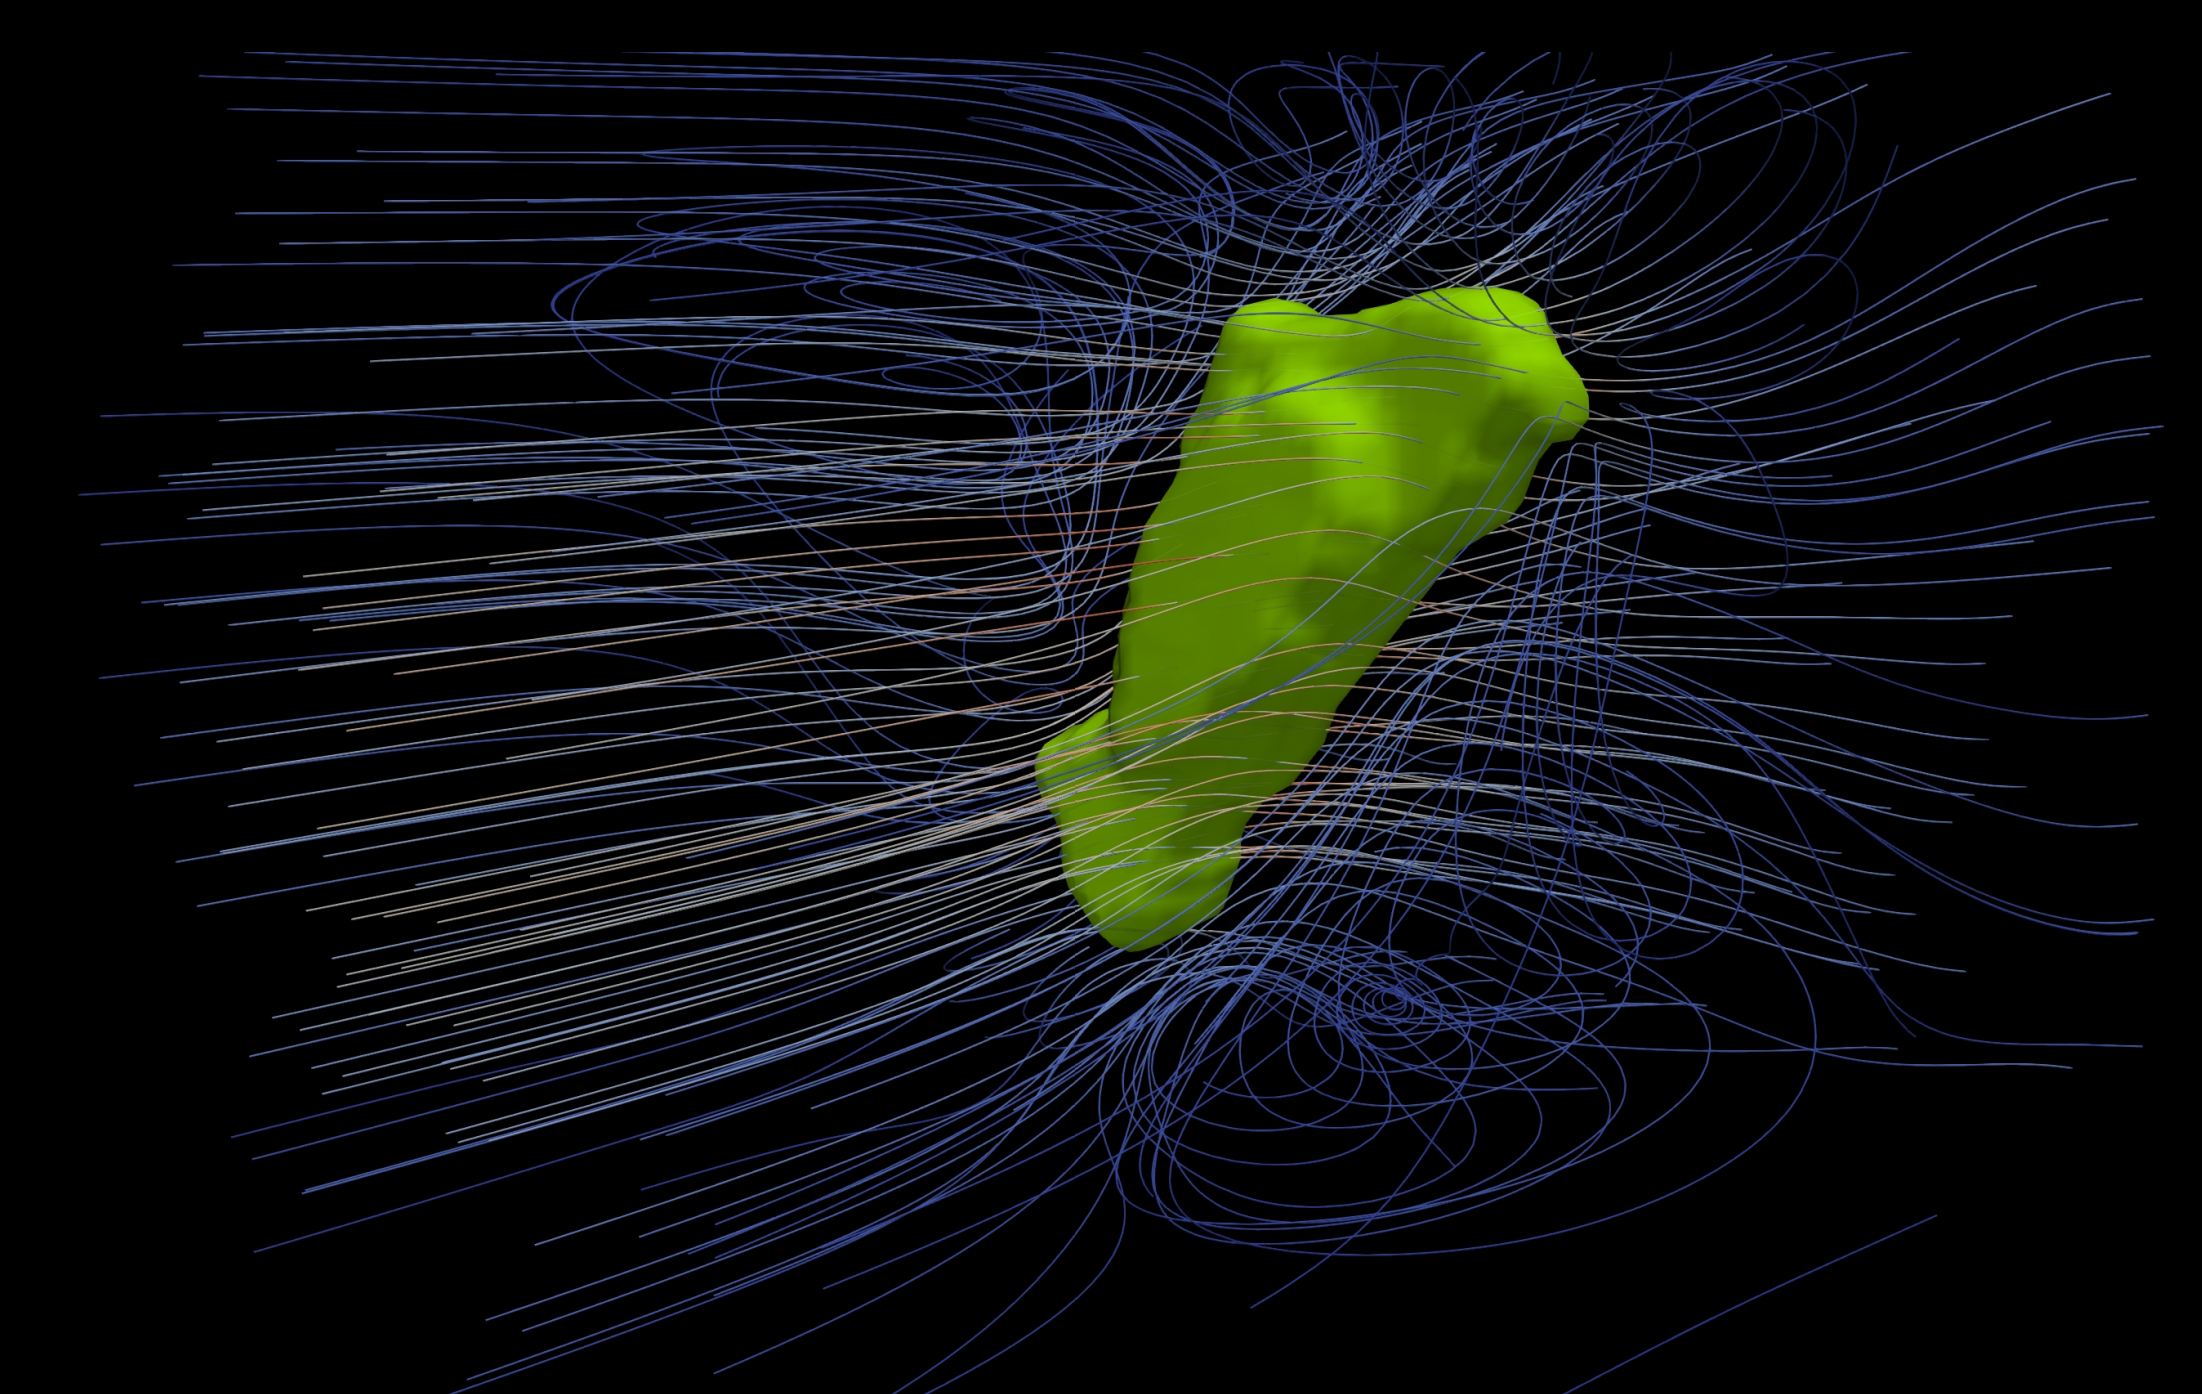

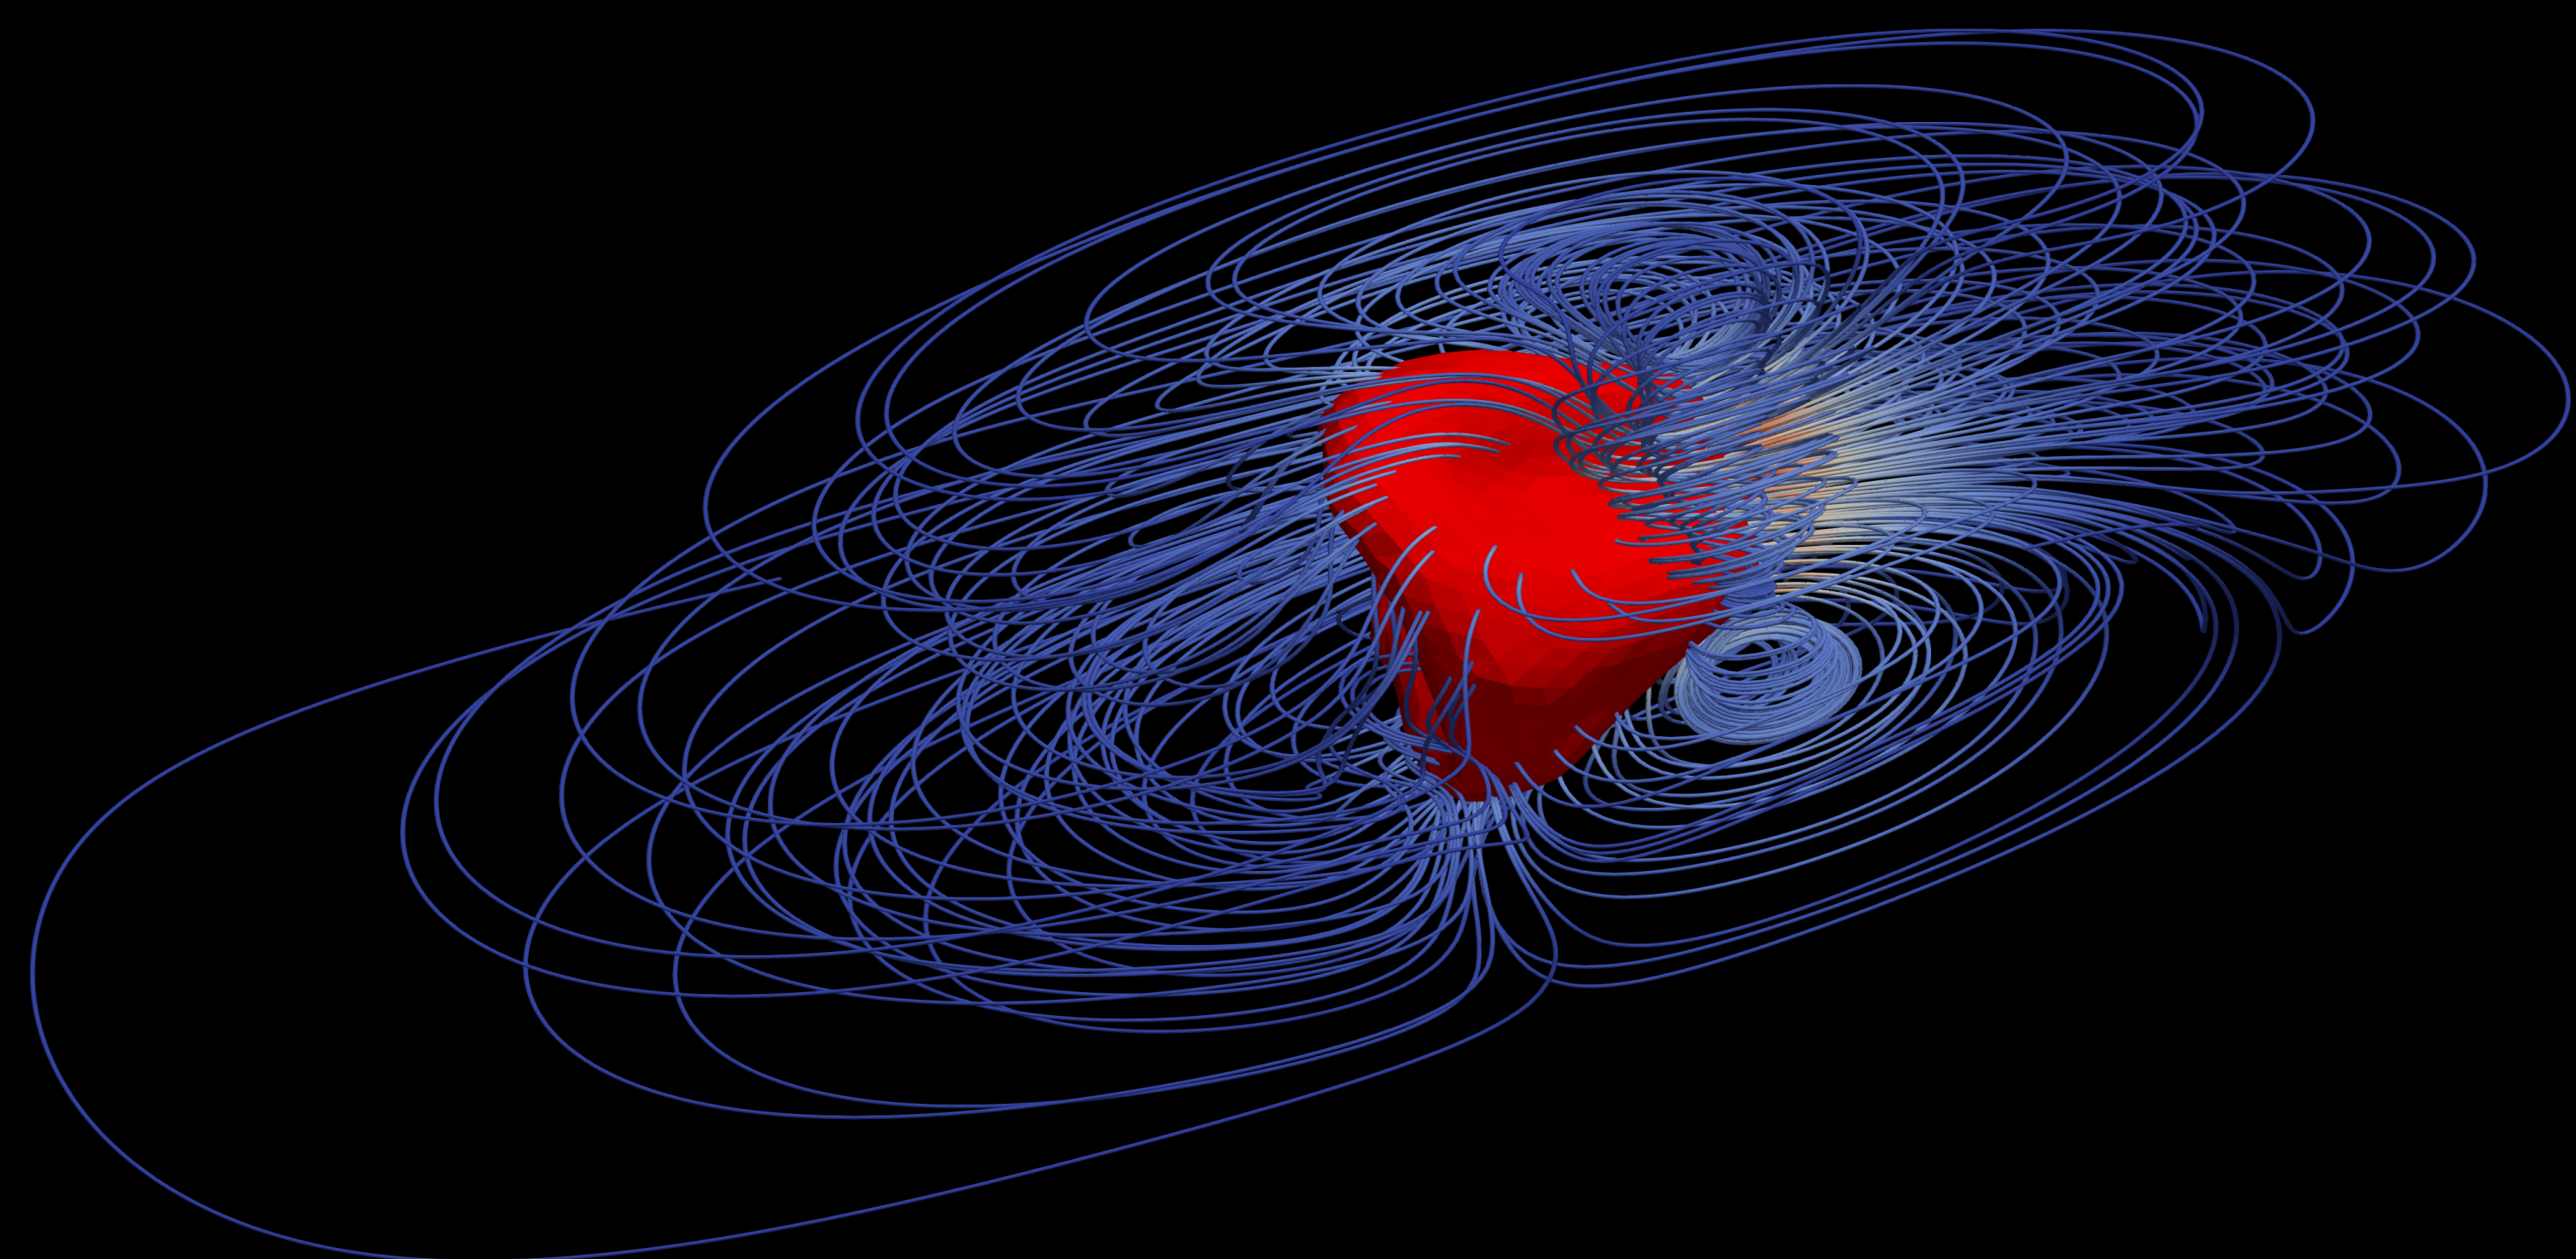

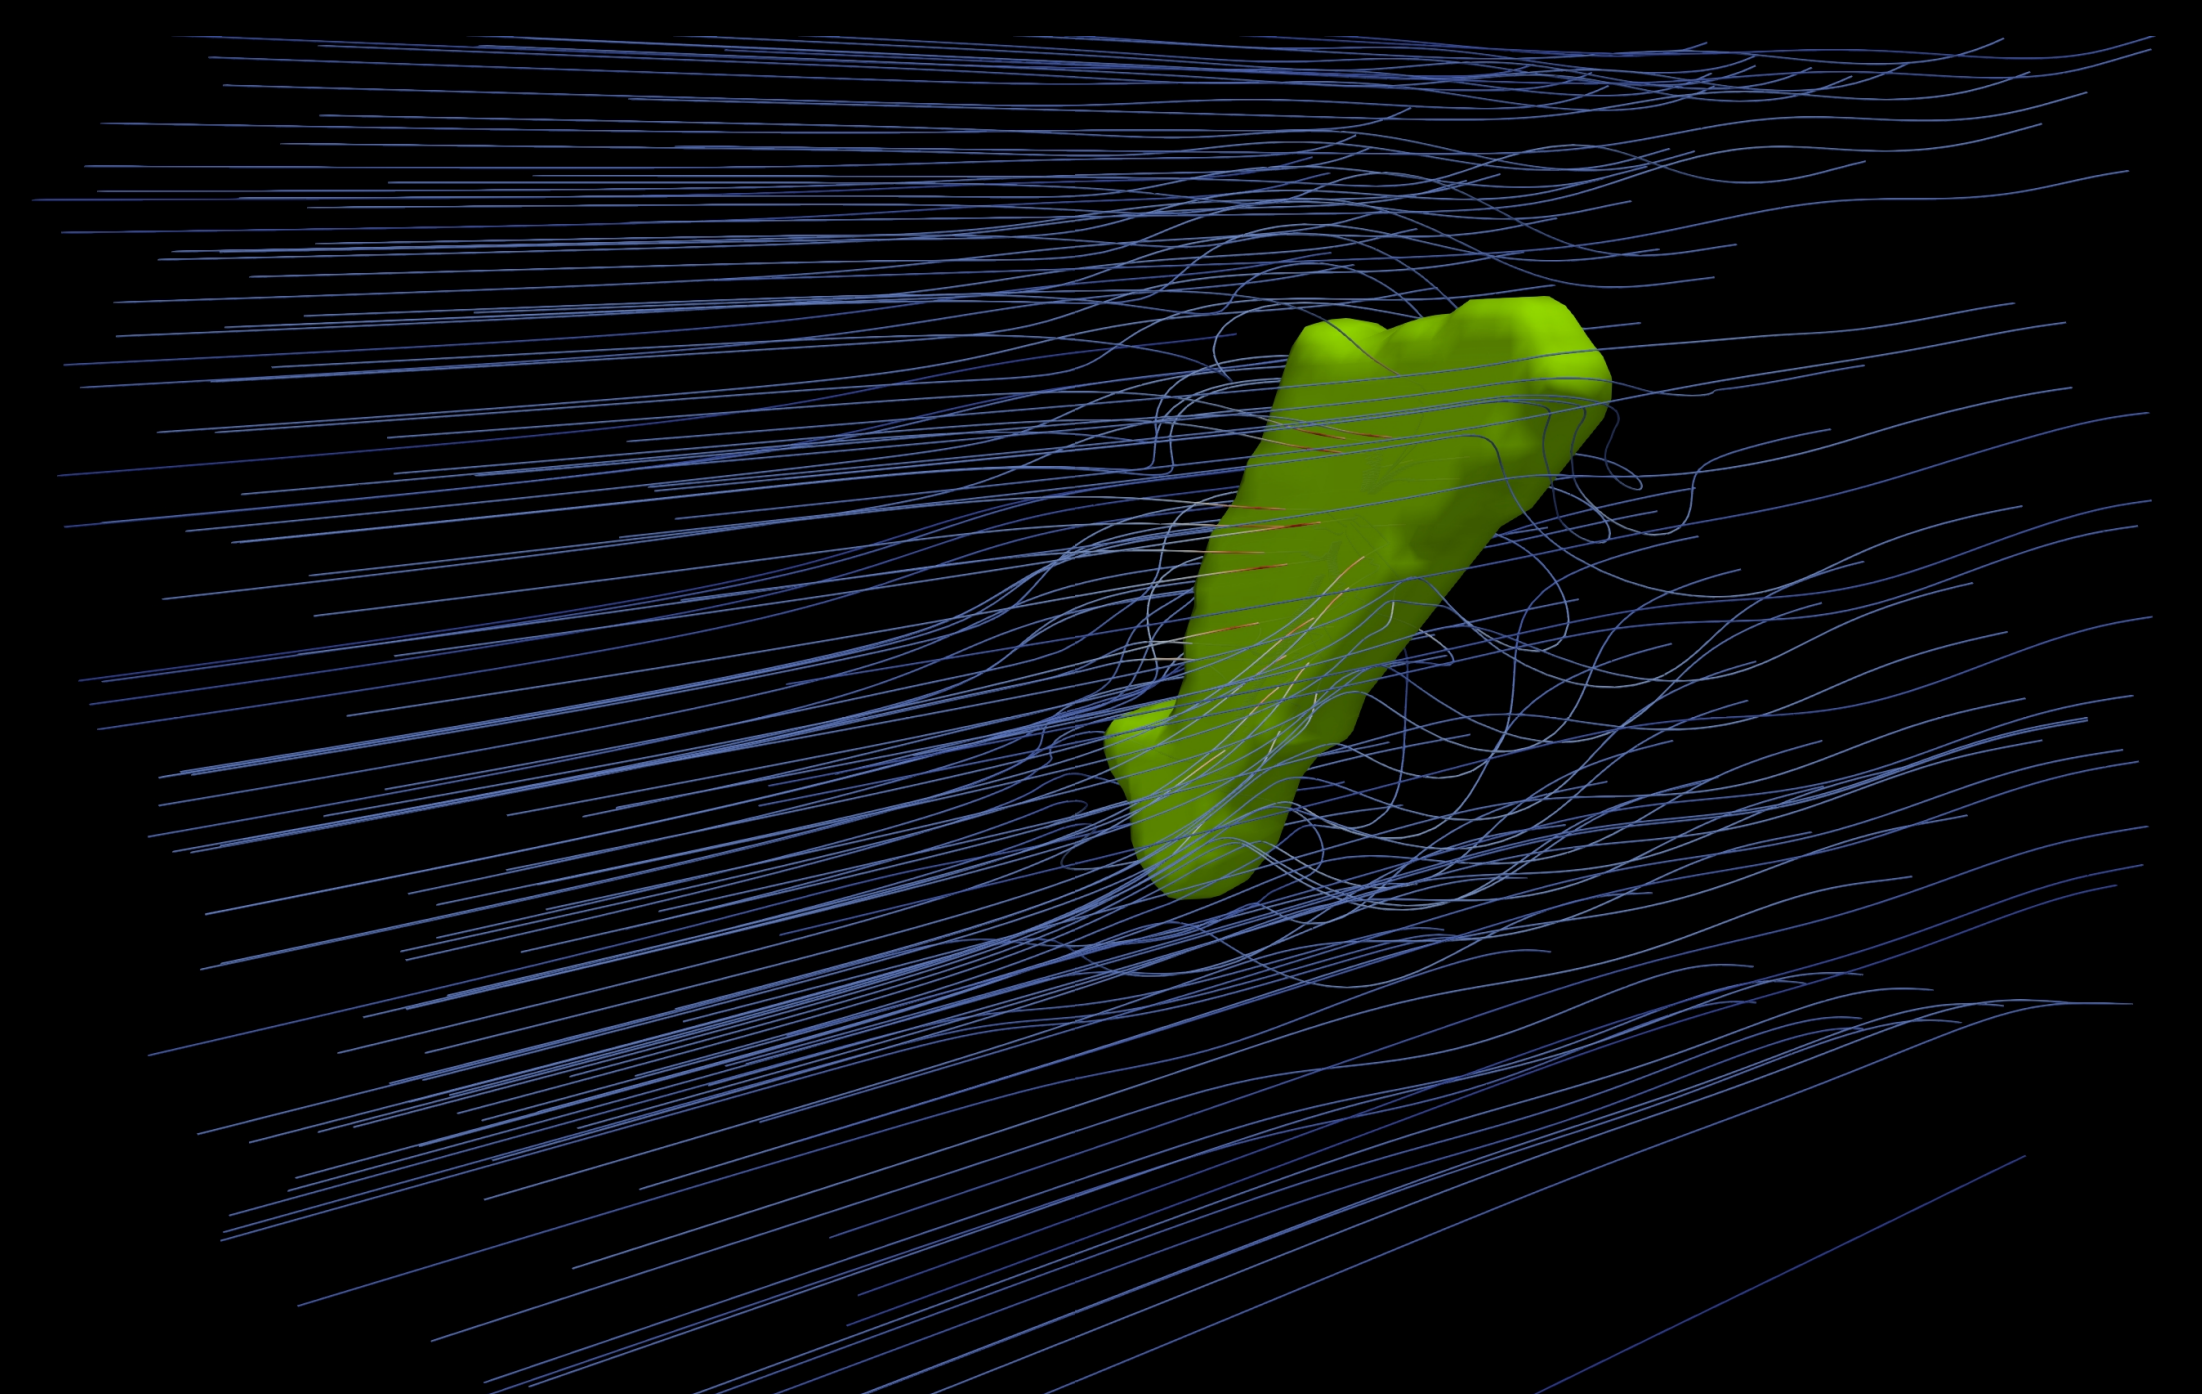

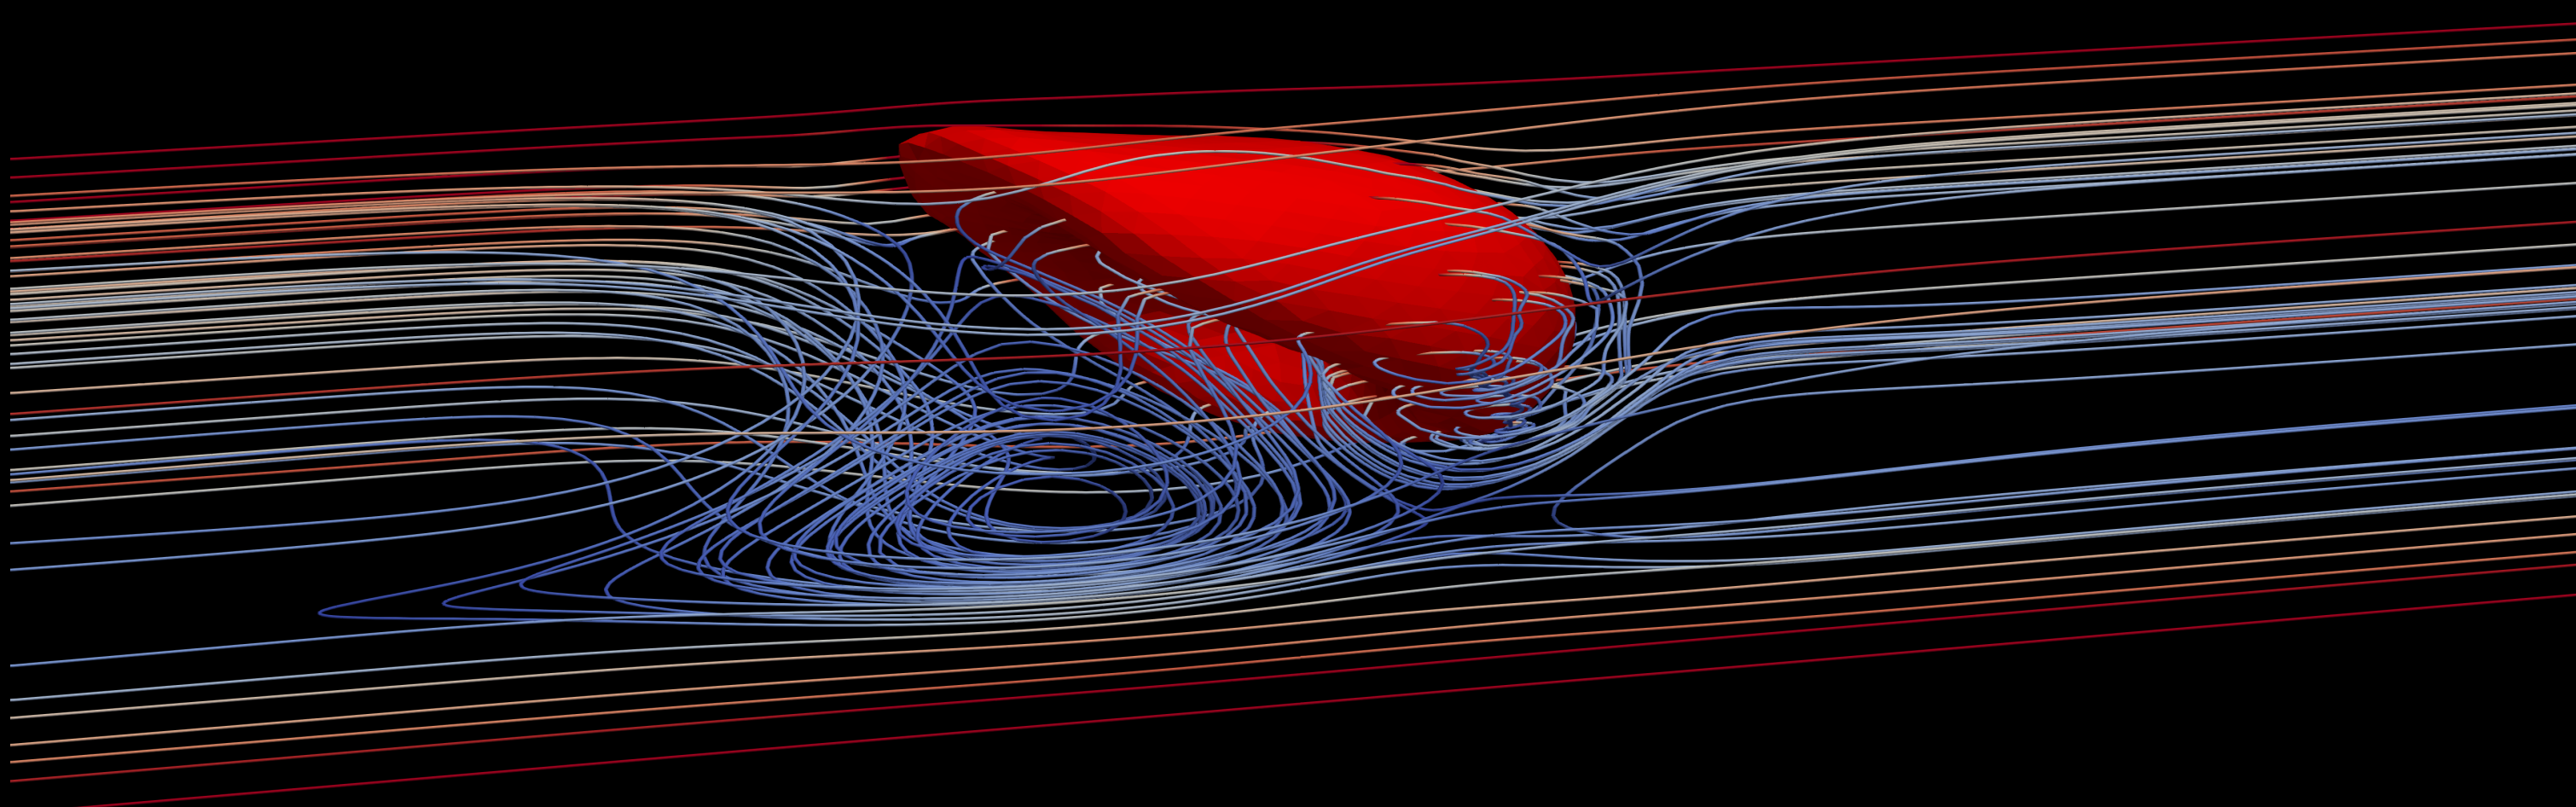

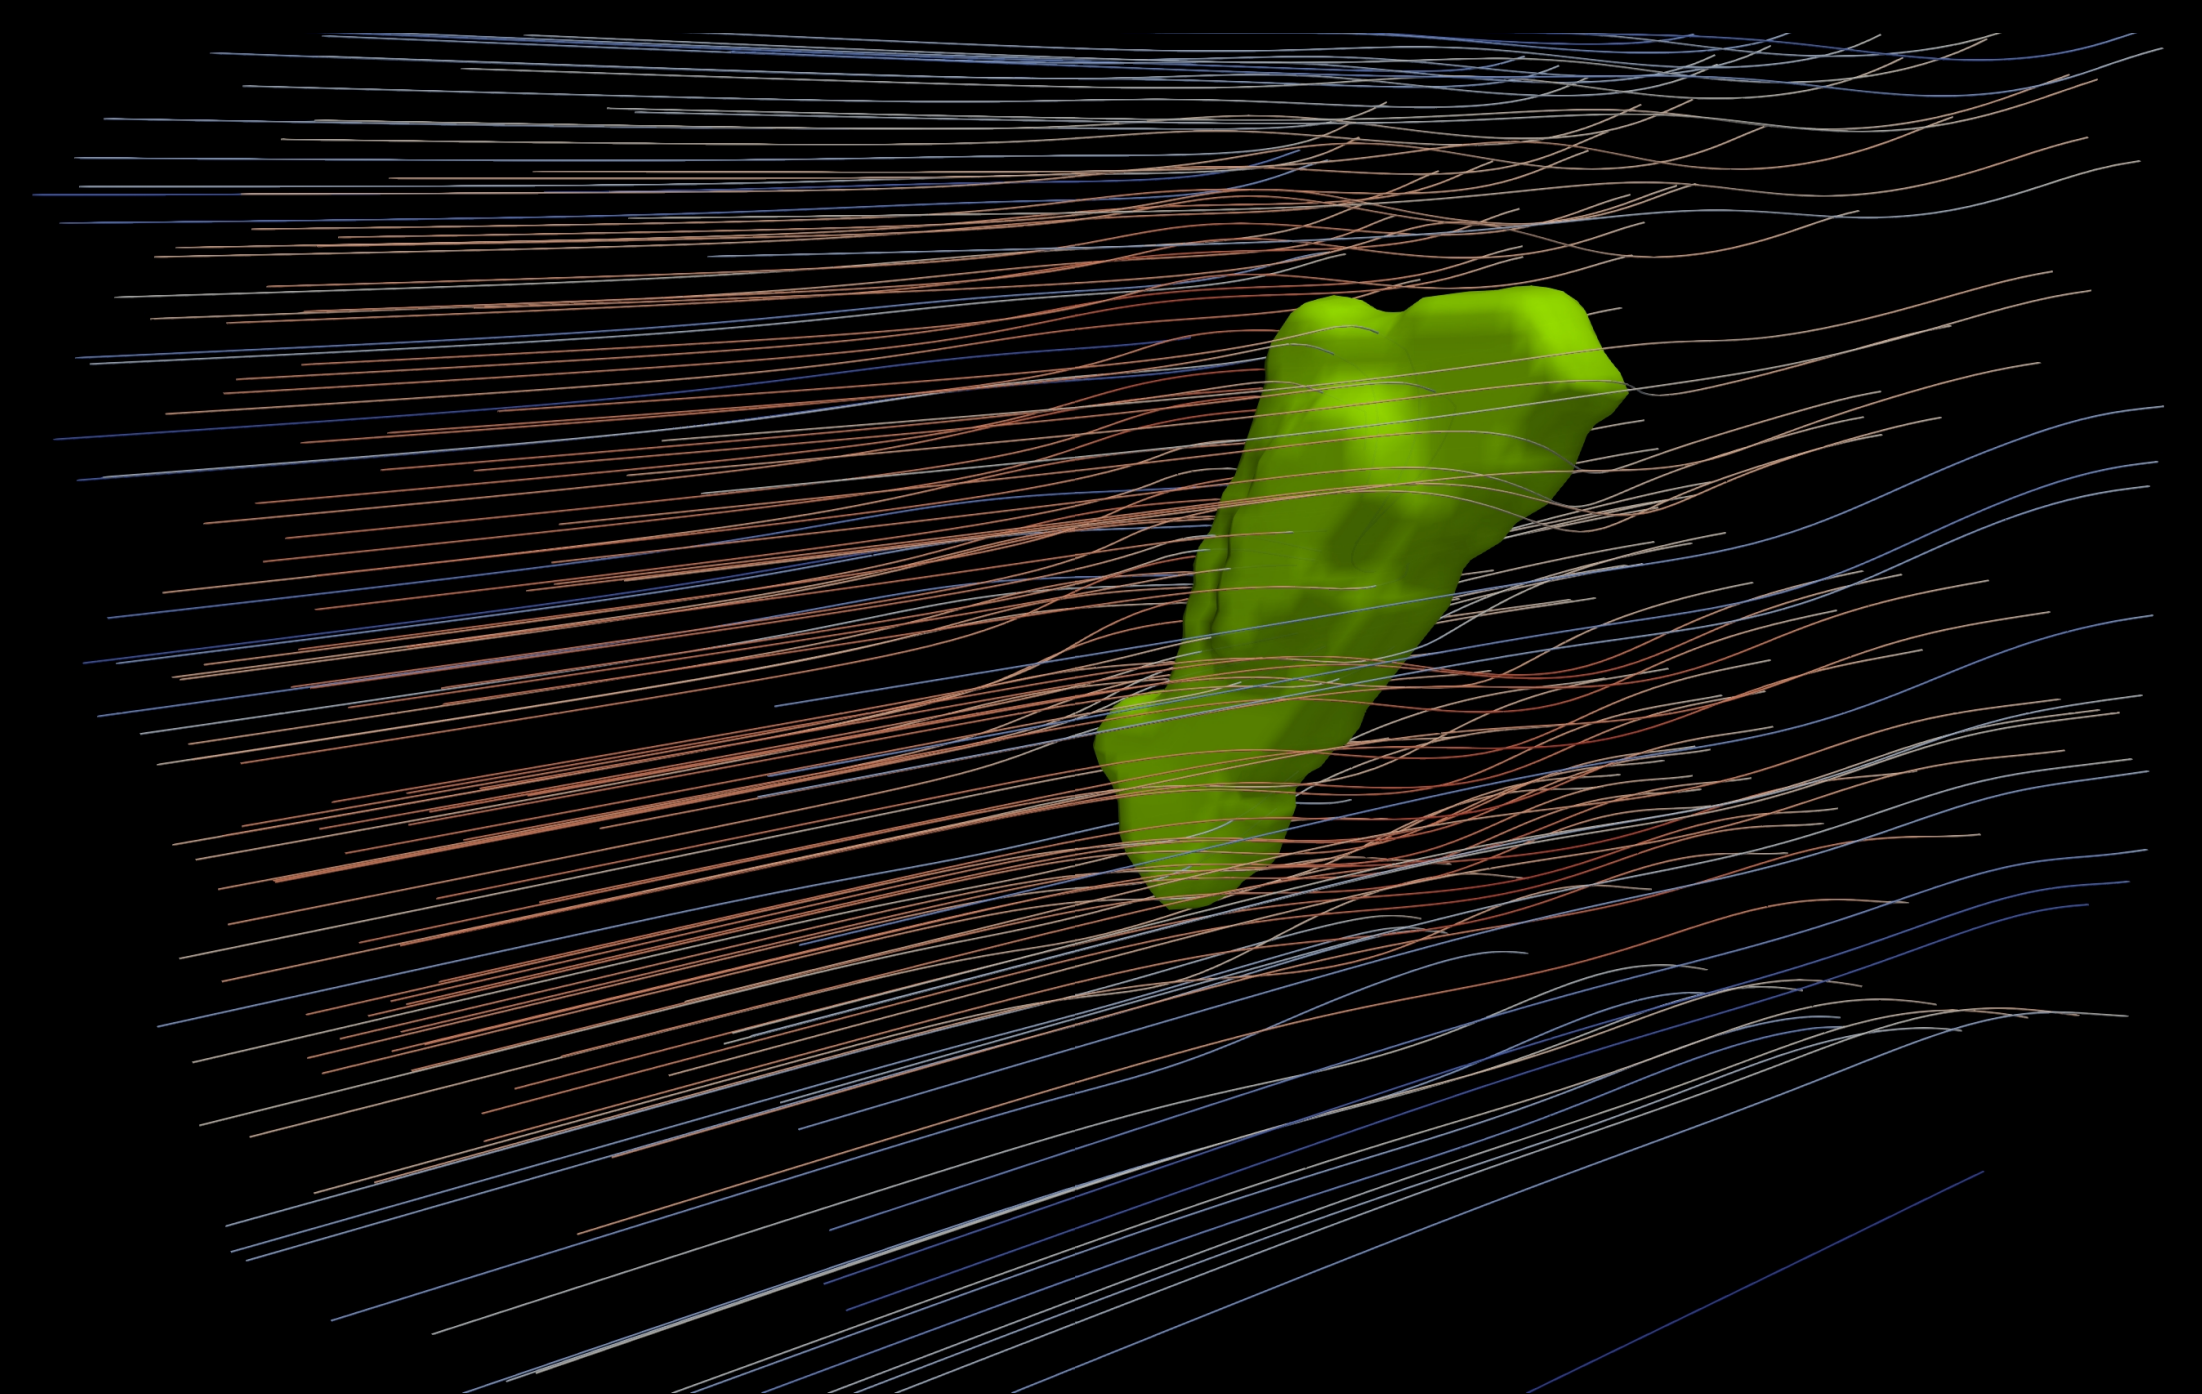

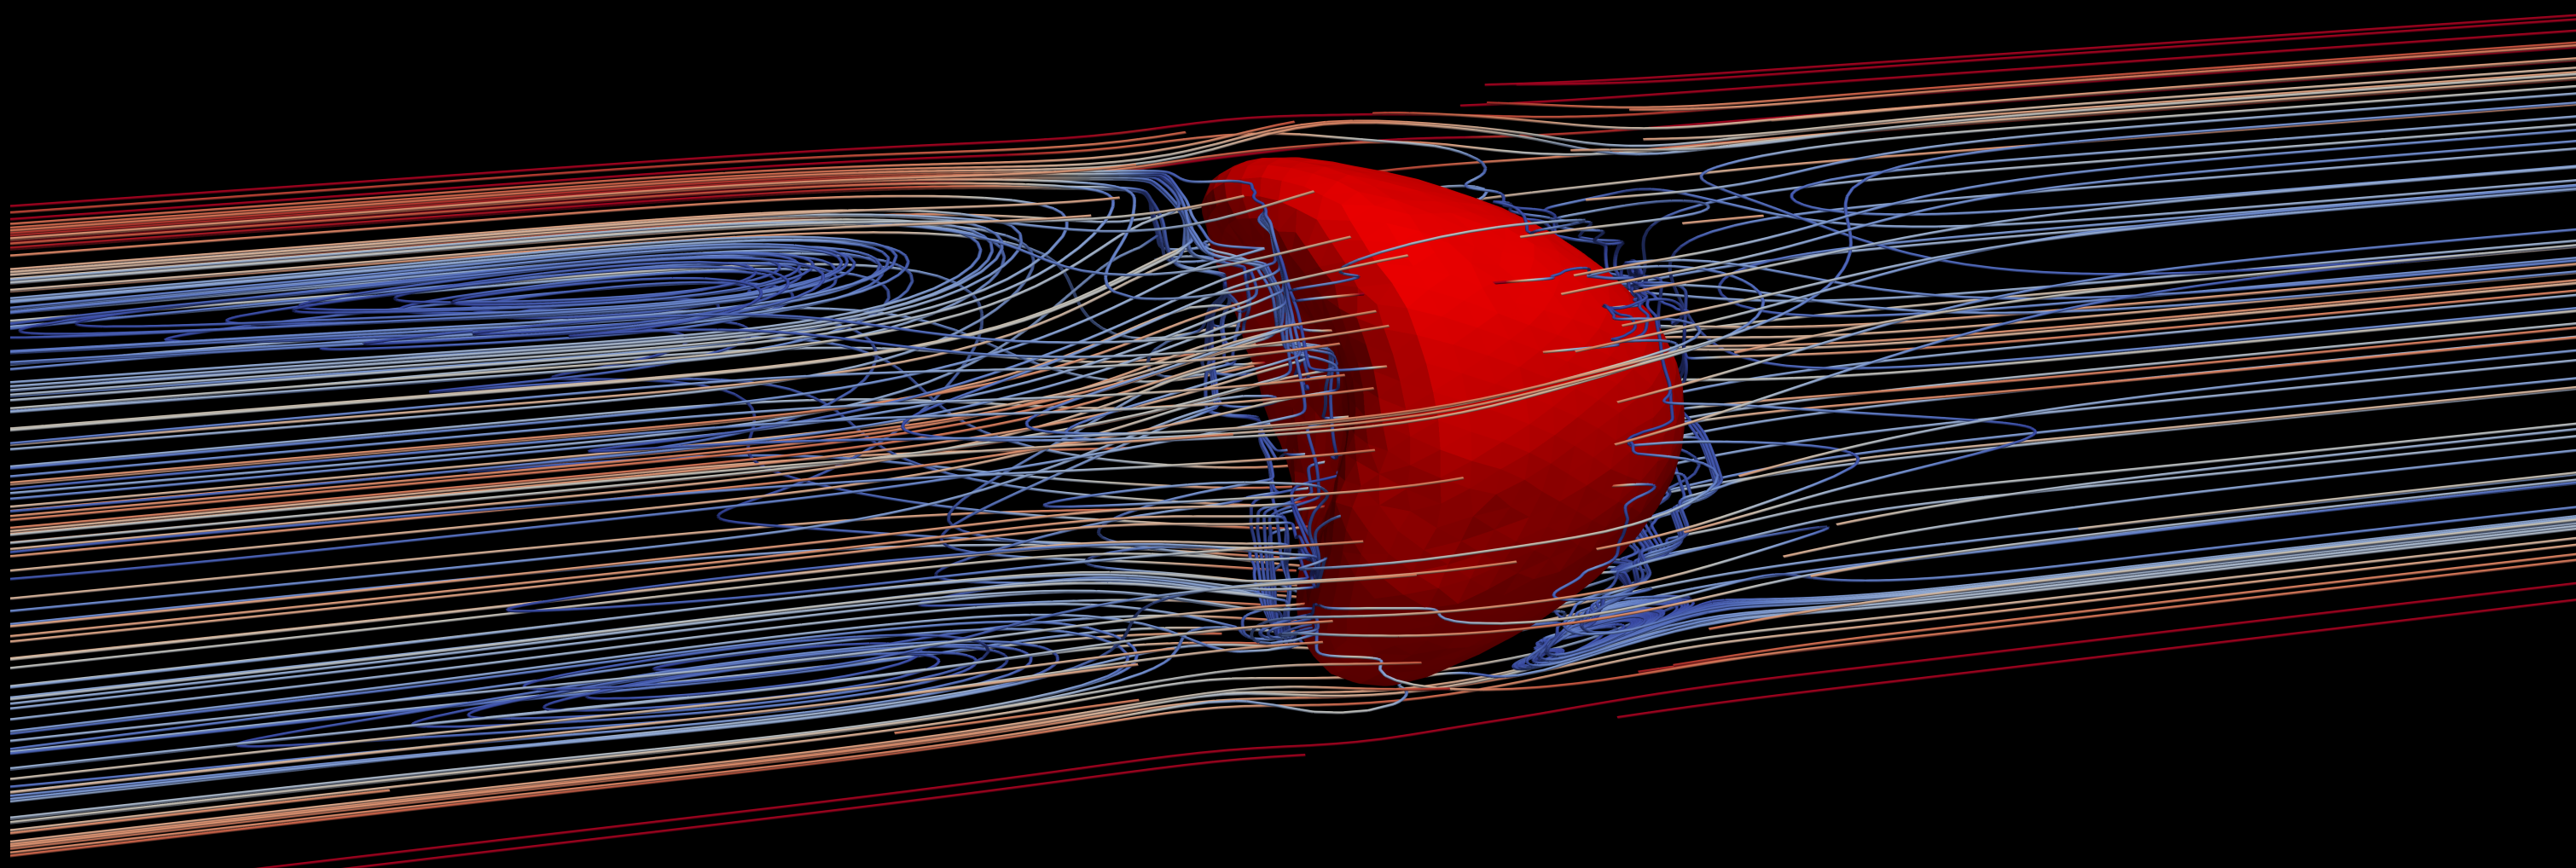

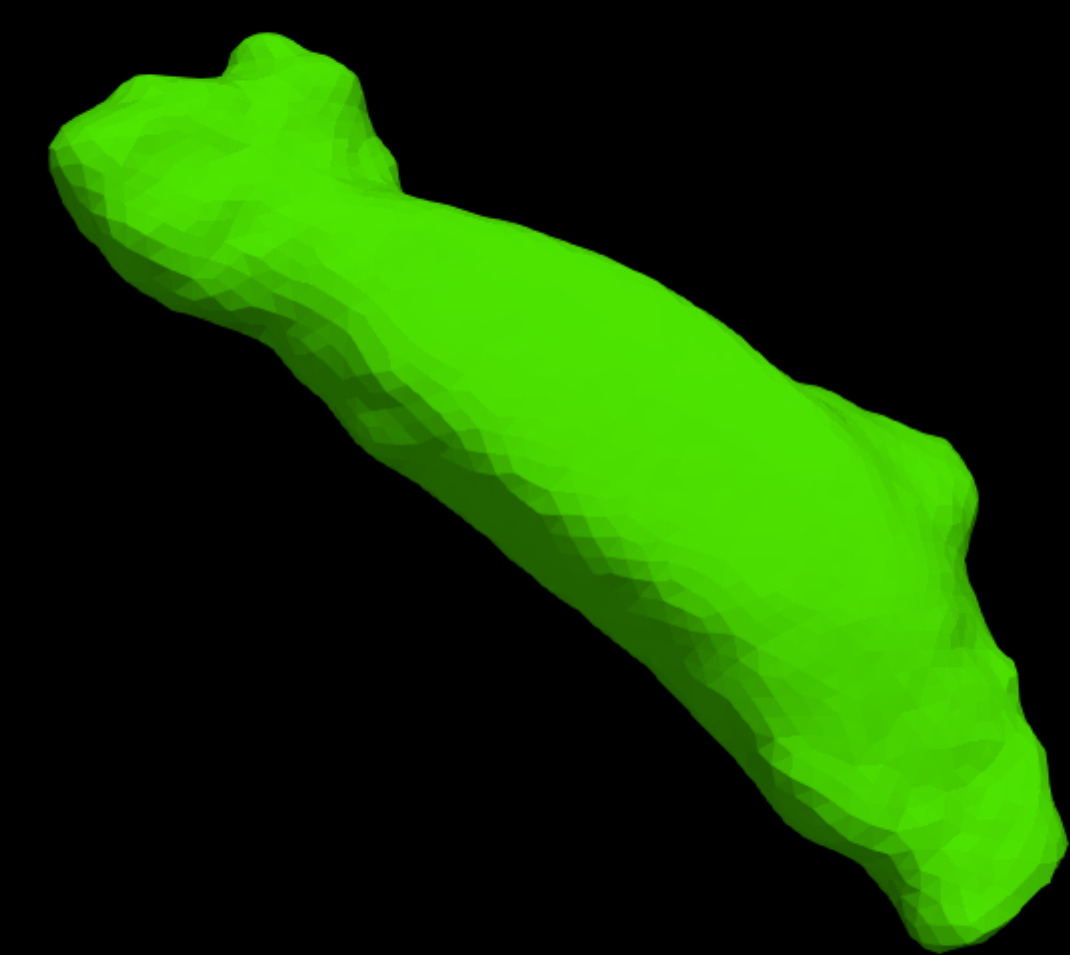

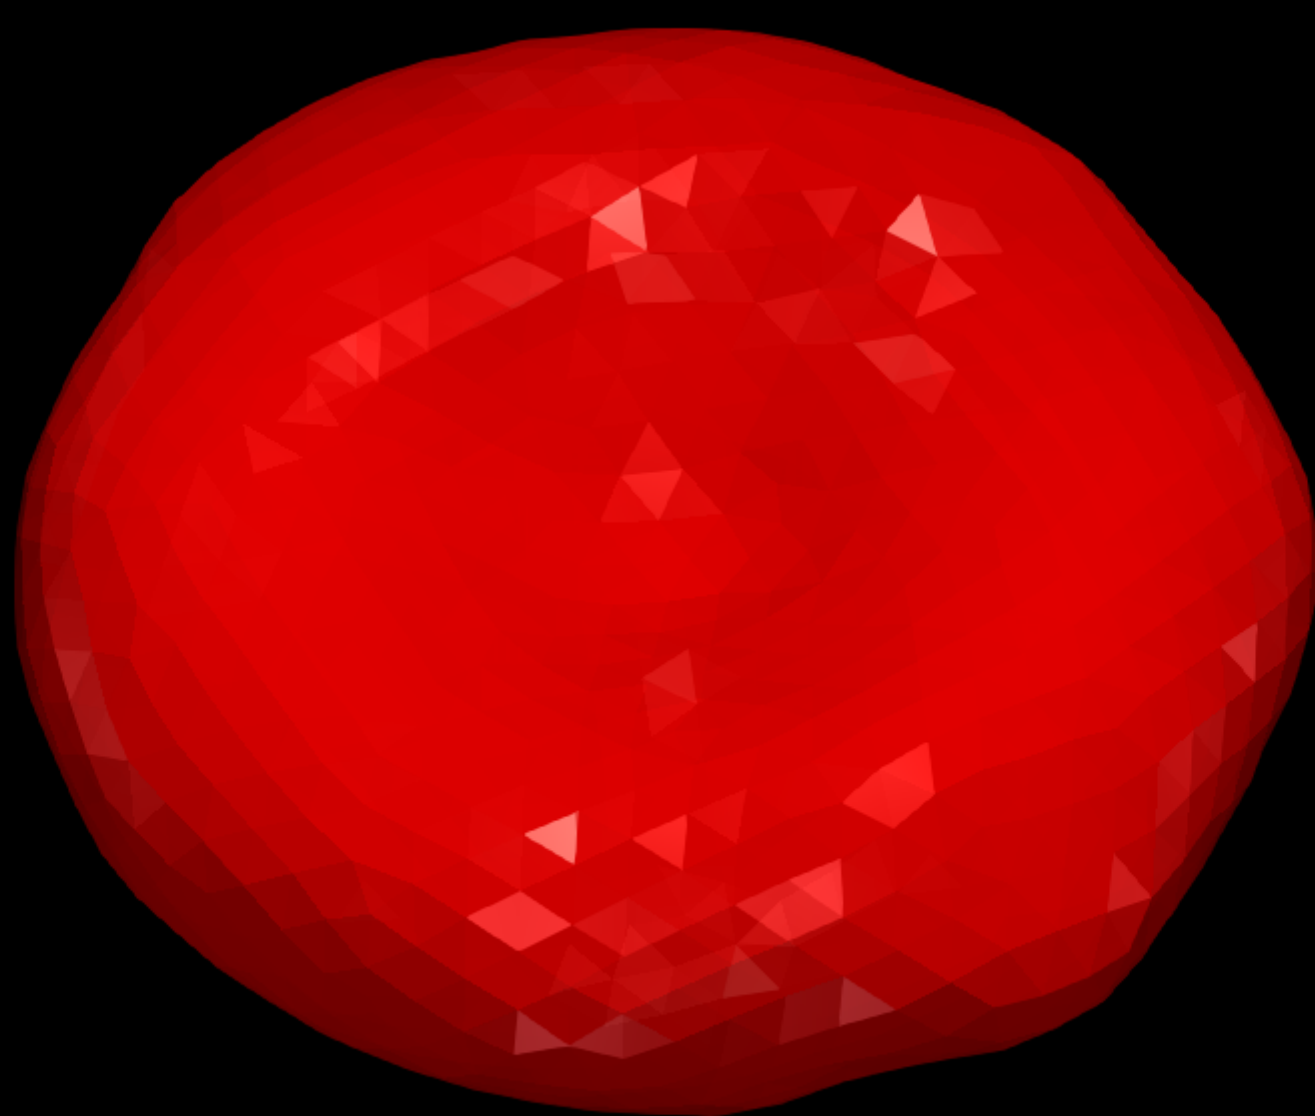

Aaron Vanyo and Amanda Haage

²Biomedical Sciences
University of North Dakota
Grand Forks, ND, United States

Red Blood Cell

Cancer Cell (MB231-TGFb)

The extracellular vortical flow structures

This work is supported by the NSF grant number 1946202 (ND-ACES) and a start-up package of Trung Le from North Dakota State University. The authors acknowledge the use of computational resources at the Center for Computationally Assisted Science and Technology (CCAST)-NDSU, which is supported by the NSF MRI 2019077. The authors also received an allocation (CTS200012) from the Extreme Science and Engineering Discovery Environment (XSEDE). We acknowledge the financial support of NIH-2P20GM103442-19A1 to train undergraduate students in Biomedical Engineering.
